

Suhasini Surasani

Senior QA Automation Engineer

suhasinisurasani@gmail.com | (404) 642-6687 | Atlanta, GA | [LinkedIn URL]

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 6+ years automating web, API, and data-warehouse testing across financial services, healthcare, and retail. Specialized in designing maintainable Selenium/TestNG automation frameworks (Page Object Model, Data-Driven, and Hybrid), Cucumber BDD suites, and Jenkins CI pipelines, backed by strong SQL and data-validation skills. Following a planned career break, actively expanding into a modern 2026 stack — Playwright, Cypress, GitHub Actions, and TypeScript — that builds directly on this foundation.

- 6+ years across automation and manual testing: functional, regression, integration, system, performance, and UAT.
- Built and maintained framework architectures — Page Object Model, Data-Driven, Hybrid, and Keyword-Driven — with Selenium WebDriver and TestNG.
- Authored Cucumber BDD suites in Gherkin and integrated automated regression into Jenkins CI.
- Validated data warehouses and MicroStrategy reports with complex SQL across SQL Server, Oracle, and Teradata.
- Experienced across the full SDLC/STLC in Agile/Scrum and Waterfall environments.

TECHNICAL SKILLS

Automation Frameworks	Selenium WebDriver, TestNG, JUnit, Cucumber (BDD/Gherkin), Selenium Grid & IDE
API & Services	Page Object Model, Data-Driven, Hybrid, Keyword-Driven
Languages & DB	REST API, SOAP UI, Postman, Rest Assured, JMeter
CI/CD & Build	Java / J2EE, SQL · MySQL, Oracle, SQL Server, Teradata
Test Mgmt & Defect Reporting / BI	Maven, Jenkins, Docker, Git, SVN
Web	JIRA, HP Quality Center (ALM), Kanban
Methodologies	MicroStrategy
Modern (expanding)	HTML, CSS, JavaScript, XML, JSON, AJAX
	Agile/Scrum, Waterfall, SDLC, STLC
	Playwright, Cypress, GitHub Actions, TypeScript, API contract testing, accessibility (axe)

PROFESSIONAL DEVELOPMENT (2023 – PRESENT)

Used a planned career break to modernize my automation skill set — hands-on practice with Playwright and Cypress, CI/CD via GitHub Actions, TypeScript for test scripting, API contract testing, and accessibility testing (axe) — building directly on prior Selenium and Jenkins experience.

PROFESSIONAL EXPERIENCE

State Street Inc. · Massachusetts <i>Sr. Test Engineer</i>	Oct 2022 – Mar 2023
• Automated test cases with Selenium WebDriver, TestNG, and the Page Object Model. • Implemented behavior-driven scenarios with Cucumber and Gherkin. • Managed test execution and reporting through Jenkins. • Maintained manual test cases, scripts, and data against evolving requirements; logged results in JIRA for business review.	
Analytics Intell <i>Sr. Test Engineer</i>	Oct 2018 – Nov 2021
• Developed and executed SQL queries to validate data-warehouse tables in SQL Server. • Ran MicroStrategy Transaction Services and reports, validating front-end data against database tables. • Tested banking applications across Dev, QA, Demo, and Prod environments. • Verified MicroStrategy Web customization and security; tracked results in JIRA.	

High Impact Technologies · Atlanta, GA

Oct 2017 – Oct 2018

Sr. Selenium Engineer

- Configured Selenium WebDriver, TestNG, and Maven; authored Java automation scripts ahead of Agile releases.
- Built and maintained automated regression suites; tracked requirement traceability in HP Quality Center.
- Wrote SQL queries to validate database integrity and support data analysis.
- Coordinated defect analysis and resolution across development, production, and business teams.

Williams-Sonoma · San Francisco, CA

Feb 2017 – Oct 2017

QA Automation Engineer

- Built Page Object, Data-Driven, Keyword-Driven, and Hybrid frameworks in Selenium.
- Automated a highly transactional e-commerce application with Selenium WebDriver, Java, and TestNG.
- Integrated suites with Jenkins for continuous, cross-browser regression testing.
- Prepared test and defect summary reports for senior management; tracked defects in JIRA.

Kaiser Permanente · Los Angeles, CA

Apr 2015 – Jan 2017

QA Automation Engineer

- Authored test strategy, plans, cases, and scripts for a suite of global tools, systems, and databases.
- Built regression suites with Selenium WebDriver, JUnit, and TestNG, including parallel execution.
- Wrote SQL scripts to verify inserts, updates, and deletes against SQL Server and Teradata.
- Maintained continuous integration with Jenkins and version control with SVN; followed Agile/Scrum.

CERTIFICATIONS

- ISTQB Foundation Level (CTFL) — in progress
